

Linking the TI-83 to the Computer

1. TI Connect Software must be installed onto the computer.
2. The student will connect the TI-83 to the computer using a TI-Graph Link cable.
3. The student will bring up the graphed image on the calculator.
4. The student will open up the TI connect software.
5. The student will select the SCREEN CAPTURE option.
6. Just after a few seconds the calculator image will appear on the computer screen.
7. The student can now save this image onto a disc, to be opened up in the paint program.
8. Once in the paint program, the student can use their own creativity.
9. The student now can print the image.
